1 SOURCE DOCUMENT

[…] Its arrival on the evening of October 29 coincided almost exactly with high tide and generated a massive surge on the Atlantic Ocean and in New York Harbor. […] For example, approximately 8,500,000 customers lost power at peak during Sandy (U.S. Department of Energy, 2013). As of November 6 2012, two refineries in the path of Sandy, i.e. Hess Port Reading Refinery in Port Reading, New Jersey and Bayway Refinery Phillips 66 in Linden, New Jersey, were shut down. […] Gas stations in NJ could not operate because of the outage. Three health care facilities in Manhattan and Brooklyn had to emergently evacuate all patients due to the outage.
